REPORT DESCRIPTION: The *Loan Participation Discrepancy Report (PLDES1)* provides GA users a reconciliation report between Loan Participation and NSLDS data reported by GAs between loan-level data elements. This report compares data elements on loans where the link has been established between the Loan Participation and NSLDS data. The PDF report displays the borrower, loan identifiers, and other data elements for each loan where the data does not match. The extract report will produce all of the data elements whether they match or not. If the user selects PDF format, at least one SSN must be entered. SSN entry is optional for extract format. The report is sorted by SSN.
